## *Before Starting The Game*

When using the Virtual Boy, several adjustments must be made before starting the game. For your health and safety, be certain to perform these adjustments. If you wear glasses or contact lenses, be sure to wear them while using the Virtual Boy.

Insert the Game Pak into the Virtual Boy, then turn the POWER switch located on the front of the controller to the ON position. When the screen pictured to the right appears, continue with the IPD and FOCUS adjustments.

Press the START button to display the "IPD and FOCUS adjustment screen." Both adjustments are made using this screen.

## IPD Adjustment

This adjustment sets Virtual Boy to the distance between your eyes (the Inter Pupil Distance). While looking at the adjustment screen, turn the IPD dial located on top of the Virtual Boy until you can see a mark in all four corners of the screen, as shown in the following illustration. The best adjustment may allow you to see only three of the four marks. When you have completed the IPD adjustment, proceed with the FOCUS adjustment.

## Focus Adjustment

This adjustment makes sure that you see the game image in the Virtual Boy display clearly. Move the FOCUS slider to the CENTER POSITION as marked on the housing. For most people, the center position should give you the clearest image. If the image is still fuzzy, then adjust the FOCUS slider right or left until the image is sharp and clear.

## Automatic Pause Function

All Virtual Boy Game Paks contain an automatic pause function. After completing the IPO and FOCUS adjustments, press the START button and the screen pictured at right will appear. The automatic pause is preset to the ON position. Nintendo recommends that you ALWAYS set the automatic pause to ON. To override the setting, use + or - on the L-Control Pad, then press the START button to begin the game.

After playing Galactic Pinball for 20 minutes the Auto Pause Screen will come up. At this point, please take a break and give your eyes some rest. After your rest is completed, press the START button to restart the game.
